**/ dead scientists** are a two-piece alternative rock band from **Chester & Southampton, UK** /

...they formed in 2008 just as the financial crisis scorched the landscape. Inspired by rumours from the past, Cold War-era conspiracy theories and tales from history, they set about crafting conceptual songs to serve as warnings for the future...

After a 10 year hiatus they reunited as a band and resumed writing. Overwhelmed with inspiration about a world rapidly changing before their eyes culminating in a year of unprecedented chaos...the result was their debut album **WE WILL FIND THE WORDS**.

**In a world sick of experts, Dead Scientists found the WORDS //**
